Johnny Marr's signature Jaguar Guitar

Kara - 25/01/2012

Fender is very proud to announce the Johnny Marr signature Jaguar guitar, which puts the inventive sounds and distinctive design mods of one of the U.K.'s greatest modern-era guitarists in your hands. Marr is best known, of course, as the influential guitarist behind Manchester quartet the Smiths, which virtually redefined U.K. pop throughout the '80's. The master of melody's guitar includes specialized features, including custom-wound Bare Knuckle single-coil neck and bridge pickups and custom-shaped maple neck with a vintage-style truss rod. Marr's one-of-a-kind Jaguar bridge with Mustang saddles improve stability, and the lacquer finish and stylish design makes the amazing instrument look as good as it sounds!
